

e Negative

music that bleeds as it heals

eNegative is a hard-hitting, heavy rock band with an attitude as sexy as the blues. Of course, we play with shades of our various individual influences. Band members have been in projects ranging from punk rock to reggae, classical to funk to prog rock, power metal & pop! Making eNegative's sound hard driving and uncompromising in nature.

This current rock project is a breed of blues, a little punk, and some old school metal. There is a sweet & saucy, mindfully sexual approach to the song writing & our live shows, that brings out a healing hunger in the crowd.
